

FRONT RANGE CIRCLE NATURAL GAS PROJECT CONSTRUCTION COMPLETE

This map is a graphic and may not show exact locations.

Crews have completed construction and restoration of the Front Range Circle Natural Gas Project (project).

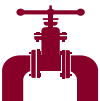

It was our pleasure to work in your community, and we thank you for your patience and cooperation.

Overview

The project included the installation of new natural gas lines, new natural gas service lines that served individual properties and new natural gas meters throughout the Front Range Manufactured Housing Community in Broomfield, Colorado. This project was completed at the request of the community's property management company.

This work allowed us to install system upgrades and continue providing safe, reliable natural gas service throughout the community.

Safety

Public safety is at the foundation of all we do. The safety of the public around Xcel Energy's natural gas system influences every decision we make.

If you suspect a natural gas leak, leave your home or business immediately. Once you are safely away, call **911**, then Xcel Energy at **800-895-2999**.
